Kim Varga

Kim Varga is an innovative and growth-minded business executive with leadership experience in services operations and consulting, channel strategy, professional engineering services and IOT business development. She is currently the Leader of Engineering and US Operations at Schneider Electric for the Digital Power business. She is accountable for bringing alive digital power architectures, distribution and controls systems, as well as power quality and metering solutions to meet the growing demands of her diverse customer base. Kim, as General Manager of her business, is responsible for P&L management, talent development and customer satisfaction.

Prior to Schneider Electric, Kim was with Cisco for 18 years leading change in program and delivery management, marketing, channel business development and engineering leadership roles. Kim also worked for Ernst & Young management consulting focused on IT process and program management. She has an MBA as well as a PMP that are very useful in the new digital economy.

Kim is a builder: of high performing teams, of new business opportunities and strong customer loyalty. She is also a literal builder on Habitat for Humanity homes! She is very passionate on giving back to the community as she serves as the Nominating Committee Chair on the Habitat for Humanity Williamson County Board, is engaged in the Women in Technology Executive Peer group and supports various STEM and Women in Engineering causes.

Kim lives in Franklin, TN with her husband and 2 dogs. She originally hails from Chicago and is now enjoying 4 wonderful seasons that do not require shoving snow. She is a self-proclaimed foodie, fitness enthusiast and loves to travel.
