

Future Homeowner Debbie Fleming

Habitat for Humanity Williamson-Maury is pleased to welcome Debbie Fleming to our Homeownership Program.

Debbie, the middle child of five, was raised by hardworking parents in Columbia, TN. Her father worked in construction, and her mother was in healthcare services. "Though my parents worked hard all their lives, they were never able to buy a home, so I recognize what a blessing it is to have the opportunity to purchase my own home!" Debbie has three adult sons: 38-year-old Tamon, 32-year-old Tony, and 18-year-old Tylan, and is a proud grandmother to her granddaughter, T'yana.

For the past six years, Debbie has worked as a machine operator for IB Tech, the company that manufactures seat adjusters for Nissan, and it just so happens that Nissan is the sponsor of Debbie's home! As a woman of faith, she says she believes that everything is coming together as planned and in the Lord's time. Debbie attends New Harvest Family Church in Columbia where she has taught Sunday school and now serves as an usher and enjoys weekly Bible study.

"I most look forward to getting to know my neighbors and to creating a home that is a place of refuge for me and a gathering place for family visits. I have lived in the same upstairs apartment for 18 years. Over time, because of her bad knees, my mother has become unable to climb the 40 steps up to my apartment. I cannot wait to have my mom be able to visit me in my home again!" says Debbie.

Debbie wants to thank Nissan North America for sponsoring her home build and looks forward to personally thanking every volunteer on the build site. "I thank God every day for this opportunity to buy my home and plan to continue to be a 'doer' and a 'giver' to pay it forward however I am able."

The Nissan North America Build will begin October 4, 2018 on East End Street in Columbia, TN.
