The Lemus Family

Habitat for Humanity Williamson- Maury is happy to welcome Linda Lemus and her two children Isaiah (11) and Mya (8) to the Homeownership Program.

Ms. Lemus was born Los Angeles, California and moved to Spring Hill when she was 17 years old. Linda and her eight siblings were raised by their single mother who worked at a daycare.

Through misty eyes, she describes her mother

as her role model, “She is sweet. She always did what she could for us. I definitely look up to her.” Today, they all reside here in the Franklin area and remain very close.

Linda currently works at Walgreens doing cosmetics, but hopes to open her own food business in the near future to bring some California-inspired flavors to the area. In her spare time, she loves to go hiking and be outdoors with her kids, cook with her daughter, and spend time together as a family.

The Lemus family is looking forward to the stability and independence that homeownership will bring. She explains that this home is her opportunity to start her own path with her children. Making memories is very important to Linda, so she is very excited to finally have a space where she can host holidays and family gatherings.

While she says that budgeting has been the most challenging part of the homeownership process, she also admits that it has also been the aspect she has enjoyed the most. “You guys do so much to help me prepare myself to buy my house.” She goes on to express her appreciation of her build sponsors and volunteers, “I am grateful and thankful for the time they are putting into my future.”

Linda’s home, our 13th Annual Women Build, will be located on 7th Street in Columbia, TN. Construction starts in April 2022 with completion scheduled for June 2022.
