

introducing the mclemore family

Habitat for Humanity Williamson-Maury is happy to welcome Lozusha and her two children, Addison (11) and Rynne (10), into the Homeownership Program!

Lozusha and her two sisters were raised by their single mother in Franklin, TN. Maintaining the household was a team effort for the family. While their mom was working multiple jobs to provide for her daughters, Lozusha and her sisters would lend a helping hand around the house and look after one another. From a young age, she learned to be responsible, caring, and hard working.

Growing up Lozusha always wanted to be a teacher. She and her sisters would often play "school" together and every week after church, Lozusha would pretend to teach Sunday school for her cousins. Today, Lozusha has transformed those childhood dreams into a reality. She currently works full time at Primrose School of East Franklin and part time at Kindercare of Cool Springs.

Faith also remains a passion in her family. Lozusha is an active member on the usher board at Shady Grove Primitive Baptist, and her daughters serve as youth ushers.

To Lozusha, becoming a homebuyer means being successful and achieving peace and stability. By having an affordable mortgage, she can spend less time worrying about increasing rental costs and spend more time making precious memories with her daughters. The McLemore family loves trying TikTok recipes, going on hikes, and playing outside together.

As she looks to the future, Lozusha is overjoyed to have a safe and healthy environment where she can enjoy a lifetime of happiness with her family.

Lozusha would like to thank the volunteers and sponsors from the bottom of her heart for the hard work and generosity that will go into building her forever home.
