

# introducing the wolf family

Habitat for Humanity Williamson-Maury is happy to welcome Paige Wolf and her two children, Anna (9) and Mia (3), into the Homeownership Program!

Ms. Wolf was born and raised in Columbia, TN, alongside her six siblings.

Growing up in a cramped trailer without heat, air, or much space, her family would sleep outside on the trampoline to escape the dog days of summer and leave the oven on through the night to stay warm during the winter.

At 17 years old, Paige became a mother, however, she didn't let this slow her down. Paige attended MTSU and currently works at Adapt Health. In her spare time, you can find Paige whipping up her homemade chili, meatloaf, and other signature meals for her family.

Paige describes her two daughters as "polar opposites." Anna (9), gravitates towards drawing and creating, while Mia (3) enjoys prefers "spooky things," such as Halloween.

While Ms. Wolf has been dreaming of having her own home with a pool, she is most looking forward to the sense of independence, safety, and stability she will gain through homeownership. Despite the hardships she has faced, Paige is focused on building a secure financial future and serving as a positive role model for her daughters.

She expresses that she has never received help before and is extremely grateful for the support from her sponsors and HFHWM.

Congratulations, Paige!
